Customer Portal – API Endpoint Listing

Overview

This document lists all API endpoints required by the **Customer Portal Interface** and maps each one to its corresponding **database tables**.
The endpoints cover key customer-facing functions:

- Public package tracking (US15)
- Account and delivery preferences management (US16)
- Notifications and communication (US17)

Tracking Page

Method	Endpoint	Description	Main Tables
GET	`/track?code=<tracking_number>`	Retrieve current order status, timeline, and estimated delivery date for public tracking page.	`orders`, `tracking_events`, `delivery_manifests`, `carriers`
GET	`/track/{tracking_number}/events`	Get chronological list of tracking events with timestamps and locations.	`tracking_events`
GET	`/track/{tracking_number}/map`	Retrieve latest geolocation of package for map visualization.	`tracking_events`, `delivery_routes`, `drivers`
GET	`/track/{tracking_number}/documents`	Retrieve downloadable delivery-related documents (label, proof of delivery).	`shipping_documents`

Method	Endpoint	Description	Main Tables
POST	`/track/{tracking_number}/subscribe`	Subscribe to email/SMS notifications for this tracking number.	`notification_logs`, `customers`, `orders`
POST	`/track/{tracking_number}/contact-support`	Submit inquiry or issue related to this shipment.	`customer_support_tickets`, `orders`, `customers`

Customer Account (Registered Users)

Method	Endpoint	Description	Main Tables
GET	`/customers/me`	Retrieve authenticated customer profile and preferences.	`customers`, `customer_preferences`
PATCH	`/customers/me`	Update basic account information (name, contact details).	`customers`, `audit_logs`
GET	`/customers/me/orders?status=<status>&from=<date>&to=<date>`	Retrieve list of customer's active or historical orders.	`orders`, `tracking_events`, `delivery_exceptions`
GET	`/customers/me/orders/{id}`	Retrieve detailed information about a specific order.	`orders`, `tracking_events`, `shipping_documents`
GET	`/customers/me/active-shipments`	Retrieve list of currently in-transit orders.	`orders`, `tracking_events`
PATCH	`/customers/me/preferences`	Update delivery or notification preferences.	`customer_preferences`, `customers`
GET	`/customers/me/preferences`	Retrieve all stored customer preferences.	`customer_preferences`

PROF

Issues & Customer Support

Method	Endpoint	Description	Main Tables
GET	`/customers/me/orders`	Retrieve all orders belonging to the logged-in customer (for issue reporting view).	`orders`, `carriers`, `tracking_events`

Method	Endpoint	Description	Main Tables
GET	`/customers/me/orders/{id}`	Retrieve details of a specific order (used in “See Details”).	`orders`, `tracking_events`, `shipping_documents`
POST	`/delivery-exceptions`	Create a new delivery exception record linked to an order (triggered by “New Issue”).	`delivery_exceptions`, `orders`, `customers`, `users`
GET	`/customers/me/delivery-exceptions?status=<status>`	List all delivery exceptions reported by the logged-in customer (for *Active Issues* view).	`delivery_exceptions`, `orders`
GET	`/delivery-exceptions/{id}`	Retrieve full details of a specific delivery exception (issue details screen).	`delivery_exceptions`, `orders`, `users`
PATCH	`/delivery-exceptions/{id}/feedback`	Submit feedback after resolution (rating & comment).	`delivery_exceptions`
POST	`/support/contact`	Send a general inquiry or message to the customer service team.	`notification_logs`, `customers`, `users`

Notifications & Communication

Method	Endpoint	Description	Main Tables
GET	`/notifications`	Retrieve list of recent notifications (email, SMS, push).	`notification_logs`, `notification_templates`
PATCH	`/notifications/{id}/mark-read`	Mark a notification as read.	`notification_logs`
POST	`/notifications/subscribe`	Enable or update notification subscriptions (email/SMS).	`customer_preferences`, `notification_logs`
GET	`/notifications/preferences`	Retrieve notification channel preferences.	`customer_preferences`
PATCH	`/notifications/preferences`	Update notification preferences by type.	`customer_preferences`, `customers`
POST	`/notifications/test`	Send a test notification for validation.	`notification_templates`, `notification_logs`

Authentication & Access

Method	Endpoint	Description	Main Tables
POST	`/auth/signup`	Create a new customer account.	`customers`, `audit_logs`
POST	`/auth/login`	Authenticate customer credentials.	`customers`
POST	`/auth/logout`	End session for authenticated customer.	`audit_logs`
